

May 28, 2004
Dear FCC:

The one thing that I LOVE about XM Satellite radio is the fact that I can tune into TRAFFIC and WEATHER instantly and hear updates for my area at ANY time when I need them. With regular radio, I cannot get this info on the spot.

I am paying for the XM service and this should be no different than if I chose to get my news by watching my cable channel [which I pay for] or turning on the local tv station broadcast.

If I pay for the service, then I can listen to what I want, when I want. I have a choice and I prefer to hear my weather and traffice on XM.

Sincerely,
Teryl Hollins
